This Application, filed December 26, 2007, is a 371 of PCT/US04/33145, filed October 6, 2004, and claims priority to US Provisional Application 60/509,593, filed October 8, 2003.

Applicant filed an amendment to the claims of April 6, 2006. Claims 1-37 are cancelled. Claims 38-50 are new.

Claims 38-50 are pending.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 38-47, drawn to an expression vector comprising a nucleic acid sequence of CAP(6D)-1, 2, or a fragment thereof, and a nucleic acid sequence encoding human B7.1.

Group 2, claim(s) 48-50, drawn to a method of preparing an expression vector comprising the nucleotide sequence of CAP(6D)-1,2 or a fragment thereof, and a nucleotide sequence comprising human B7.1.

The inventions listed as Groups 1-2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature, a vector comprising the coding sequence of a CEA peptide and the coding sequence of human B7.1, was known at the time of filing. von Mehren et al., 2000, Clinical Cancer Research, 6: 2219-2228 teach an ALVAC-CEA B7.1 vaccine (von

Mehren et al., abstract). The CEA antigen is a 9-mer peptide from CEA (von Mehren et al., page 2220, 2nd col., 1st parag.).

The claims are further restricted.

Claims 44 and 45 of Group 1 and Claims 49 and 50 of Group 2 are drawn to vectors that further comprise sequence that encode a tumor associated antigen or an angiogenesis-associated antigen and one must be elected. Each of the sequences is distinct because each has a different biological activity.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Claim 40 of Group 1 is drawn to different types of vectors (plasmid or viral) and one must be elected.

Should Applicant elect "viral" vector of claim 40, then a further species election of viral vector types, as listed in claim 41, is required.

Should Applicant elect "poxvirus" of claim 41, then a further species election of type of poxviral vector, as listed in claims 42 and 43 is required.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 38-40, 44-47 of Group 1 are generic for types of vectors used to express CAP(6D)-1,2 and human B7.1.

Claims 38-41, 44-47 of Group 1 are generic for viral vectors used to expresss CAP(6D)-1,2, and human B7.1.

Claims 38-47 of Group 1 are generic for specifically named poxvirus vectors.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1632

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

MPEP 1893.03(d) states: If an examiner (1) determines that the claims lack unity of invention and (2) requires election of a single invention, when all of the claims drawn to the elected invention are allowable (i.e., meet the requirements of 35 U.S.C. 101, 102, 103 and 112), the nonelected invention(s) should be considered for rejoinder. Any nonelected product claim that requires all the limitations of an allowable product claim, and any nonelected process claim that requires all the limitations of an allowable process claim, should be rejoined. See MPEP § 821.04 and § 821.04(a). Any nonelected processes of making and/or using an allowable product should be considered for rejoinder following the practice set forth in MPEP § 821.04(b).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joanne Hama, Ph.D. whose telephone number is 571-272-2911. The examiner can normally be reached Mondays, Tuesdays, Thursdays, and Fridays from 9:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Paras, can be reached on 571-272-4517. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to (571) 272-0547.

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public. For all other customer support, please call the USPTO Call Center (UCC) at 800-786-9199.
